

Australia's largest operating solar farm

Contributing to Queensland's net zero future

460 MWp solar

Over 1 million
panels

Generating enough
energy to power
235,000 homes

Created over
450 jobs in the Western
Downs region

Distributing \$100,000
p.a. in community
benefit-sharing

This solar farm has a 320 MW power purchase agreement with CleanCo, to supply clean energy to Queensland.

"We take the energy generated here and integrate it in our portfolio of renewable and firming assets to provide reliable, sustainable energy to our customers and to Queensland."

– Rimu Nelson, General Manager, CleanCo Queensland

Neoen's first big battery in Queensland

Providing grid-reliability and stability services in an evolving energy landscape by firming variable renewable energy, supporting the modernisation of Queensland's electricity network

540 MW / 1,080 MWh storage

Comprising 280 Tesla Megapack 2XL units

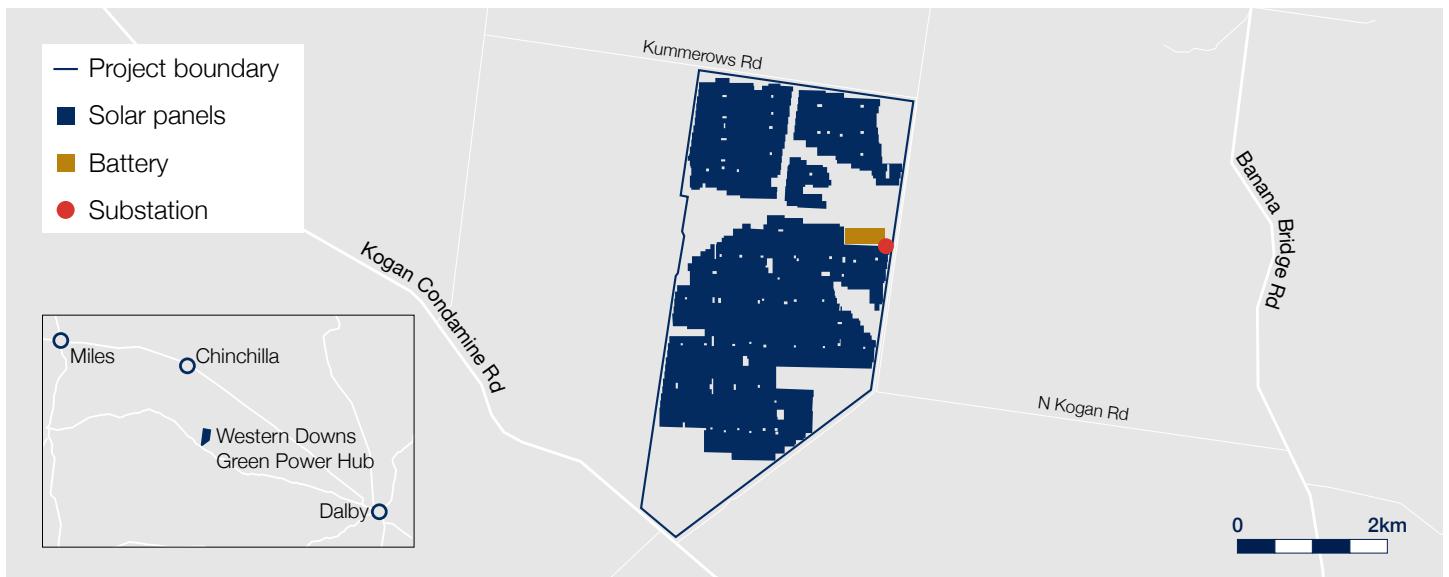

Connecting to the Western Downs substation

Equipped with grid-forming technology using ARENA funding

Exceeding its target of 20% local employment

The battery supports multiple bespoke virtual battery contracts, allowing our customers to hedge their load (or customer/retailer load) by mimicking the operation of a grid-scale battery using a software developed in-house by Neoen's teams and without having to develop, build, own or physically operate one.
